HYACINTHS IN MIXTURE.

FOR BEDS OR BORDERS.

Cannot be too strongly recommended to all admirers of spring gardening. The varieties selected, in the different colours, are such as will bloom at one time, and produce a display so rich and varied, combined with delicious perfume, that no other spring flower can equal.

		Per 100. s.	d.	Doz. s.	d.

203	**SINGLE RED**				
204	**SINGLE WHITE**				
205	**SINGLE YELLOW**				

HYACINTHS, ROMAN.

Are most suitable for early forcing, producing their neat and pretty spikes of flowers from November to January; they are well adapted for bouquets and vases, and are very fragrant.

		s.	d.		s.	d.
206	Per dozen	4	6	Per 100	32	0

NARCISSUS.

POLYANTHUS NARCISSUS.

These have the fragrance of the Jonquils, and are useful for in-door decoration; they are of easy culture, and can be forced early. The *Double Roman* is very desirable for early blooming; two or three bulbs are recommended to be planted in one pot, so as to produce a fine mass of flowers.

CRIMEAN SNOWDROP (*Galanthus plicatus*), of larger and more robust growth than the common Snowdrop, 10*d.* each ; 9*s.* per dozen.

AMARYLLIS (HIPPEASTRUM) IGNESCENS.

A fine stove bulb from New Grenada, producing umbels of flowers, which emerge from between the sessile lanceolate bracts. The flowers expand to a breadth of about five inches, and are of a light fiery orange red colour, stained at the base with pale green, forming a large greenish white eye or centre; the stamens are declinate, of the same colour as the perianth, with yellow pollen. A bold and attractive flower. 10*s.* 6*d.*

AMARYLLIS (HIPPEASTRUM) VITTATUM HARRISONIÆ.

A remarkably distinct and effective variety of Amaryllis, imported from Lima in Peru. It has a stout glaucous green scape, bearing a two-valved spathe, from which issue several (about five) pedicellate flowers, which are remarkable for their long narrow tubes, fully 3½ inches in length, the segments of which are slightly spreading at the tip, opaque waxy white, and marked on each of the six segments with two broad deep crimson lines, running a considerable distance down the tube. The flowers are sweet-scented, with a faint odour of *Daphne*. It has been awarded a First Class Certificate by the Floral Committee of the Royal Horticultural Society. 1 guinea.

AMARYLLIS (HIPPEASTRUM) VITTATUM HARRISONIÆ.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then when flowers are required, if started in a gentle heat they develope their flower scapes, and quickly produce their large Lily-like blossoms, which are of various colours, generally embracing crimson, white, and red, scarlet, rose-flaked, striped white and crimson, with various shades of these colours diversified.

AMARYLLIS, choice selections of good sorts, 3, 4, and 6 guineas per dozen.

AMARYLLIS BELLADONNA (The Belladonna Lily).

30 This beautiful hardy bulb is imported early in September, with its flower scapes almost ready to expand, and by the end of the month they are in full bloom, their large handsome white flowers richly flushed with rosy purple rendering them extremely useful for greenhouse and conservatory decoration. *1s.* to *1s. 6d.* each.

CYCLAMEN PERSICUM.

30s. 42s. and 60s. per dozen, according to the varieties and size of bulbs.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty some weeks—indeed, almost longer than any other flowers with which we are acquainted.

GLADIOLUS CRUENTUS.

A very beautiful species, introduced from Natal. It produces a tall scape, terminating in a distichous spike of large broadly-campanulate subringent flowers of a bright blood red colour, the upper segments uniformly coloured, and the lower smaller ones crimson at the base and scarlet at the apex. The two lateral segments of the lower lip are marbled about half way down with a white zone dotted with crimson, which on the exterior edge runs out into a long point, like the flame of the florists' Tulip. This distinct species has been figured both in the *Botanical Magazine* and in the *Florist and Pomologist.* 3*s.* 6*d.* and 5*s.*

GLADIOLUS PURPUREO-AURATUS.

This new species has been introduced from Natal; the flowers are pale golden yellow, with a large purple blotch, which is broader at the apex, on the disc of each of the two lower segments. Spikes nearly a foot in length, and giving ten to fifteen flowers each.

This remarkable and distinct species has been figured in the *Botanical Magazine*, tab. 5,944. 7*s.* 6*d.*

ASTILBE BARBATA,

GENERALLY, BUT ERRONEOUSLY, KNOWN AS

HOTEIA JAPONICA, AND SPIRÆA BARBATA.

Cannot be too highly appreciated as a decorative plant for early forcing, its pretty erect shining green foliage, surmounted by numerous beautiful and graceful panicles of white inflorescence, giving the whole plant an elegant appearance, and rendering it at once most pleasing and useful for decorative purposes.

Strong imported clumps, 9*s. and* 12*s. per dozen.*

SPIRÆA PALMATA.

In a description of this plant, given in the *Botanical Magazine*, No. 285, Dr. Hooker says: "By far the handsomest species of the genus hitherto imported, and certainly one of the most beautiful hardy plants in cultivation; the deep purple red of the stems and branches, passing into the crimson purple of the glorious broad corymbs of flowers, contrasts more exquisitely with the foliage, which in autumn assumes beautiful tints of brown and golden yellow." It is a native of Japan, and was discovered and introduced by Mr. Fortune. 2*s.* 6*d.* and 3*s.* 6*d.* each; 24*s.* per dozen.

IRIS.

ENGLISH (I. anglica or Xiphioides).

For brilliancy of colour and fine vigorous foliage the English Iris takes rank among the handsomest of flowering bulbs. They greatly resemble the Spanish Iris in style of growth, attaining a height of about 2 feet, and produce, during June and July, a succession of large and beautiful flowers.

LILIUM.

AURANTIACUM, *vide* Croceum

1 **AURATUM**, 3*s.* 6*d.* to 5*s.*; extra large English-grown bulbs, 7*s.* 6*d.* and 10*s.* 6*d.*; imported bulbs at the proper season, 24*s.* per dozen

2 **AURATUM RUBRO-VITTATUM**, a distinct and splendid variety; instead of being yellow, as in the ordinary "Auratum," the bands are red, and consequently very attractive; the spots are also larger, and of a very bright colour, 31*s.* 6*d.*

3 **BLOOMERIANUM**

4 **BROWNII**, 10*s.* 6*d.*

5 **BULBIFERUM**, 9*d.*

6 **CALIFORNICUM**, a splendid variety, producing from one dozen to three dozen flowers on a stem; their colour is a rich deep golden orange, attractively spotted with maroon-purple. It is one of the finest of the Californian Lilies, and is quite hardy, 5*s.*, 7*s.* 6*d.*, and 10*s.* 6*d.*

7 **CANADENSE FLAVUM**, 5*s.*

8 ,, **RUBRUM**, 5*s.*

9 **CANDIDUM FLORE-PLENO**, 9*d.* and 1*s.*

10 ,, **FOLIIS LUTEO-MARGINATUS**, the most handsome and attractive of the variegated-foliaged Lilies. 3*s.* 6*d.* and 5*s.*

11 **CANDIDUM MACULATUM (STRIATUM)**, 6*d.*

12 **CARNIOLICUM**, a distinct species from the Carniolian Mountains; flowers bright orange scarlet, spotted with black, 3*s.* 6*d.*

13 **CAROLINIANUM (MICHAUXII)**, 5*s.* and 7*s.* 6*d.*

14 **CATESBÆI**, 1*s.* and 1*s.* 6*d.*

15 **CHALCEDONICUM**, bright scarlet, 1*s.*

COLCHICUM, *vide* L. monadelphum

16 **COLUMBIANUM (PARVIFLORUM)**

17 **CONCOLOR (PARTHENEION, SINICUM)**, 3*s.* 6*d.*

18 ,, **CORIDION**, 3*s.* 6*d.*

19 **CROCEUM (AURANTIACUM)**, 9*d.*

20 **DALMATICUM**, fine double flowers of a blackish purple colour, very distinct, 21*s.*

21 **DAVURICUM FULGIDUM**, 1*s.*

22 ,, **GRANDIFLORUM**, 1*s.*

23 ,, **INCOMPARABILE**, 1*s.*

24 ,, **MACULATUM**, 1*s.* 6*d.*

25 ,, **SAPPHO**, 1*s.* 6*d.*

EXCELSUM, *vide* Testaceum

26 **EXIMIUM**, 1*s.* 6*d.* and 2*s.* 6*d.*

27 **GIGANTEUM**, 5*s.*, 7*s.* 6*d.*, and 10*s.* 6*d.*

LILIUM HUMBOLDTII.

28. A splendid species, from Humboldt county, California. It is quite hardy, and produces large golden yellow flowers, which are spotted with purple. It has been awarded a First Class Certificate by the Floral Committee of the Royal Horticultural Society. For illustration, *vide* page 18. 5*s.*, 7*s.* 6*d.*, and 10*s.* 6*d.*

29 **HUMBOLDTII PUNCTATUM**, 5*s.*, 7*s.* 6*d.*, and 10*s.* 6*d.*

30 **KAMTSCHATCENSE**, *(The Black Lily)*, 3*s.* 6*d.*

31 **KRAMERII**, 21*s.*

LANCIFOLIUM, *vide* **SPECIOSUM**

32 **LEITCHLINII**, 7*s.* 6*d.* and 10*s.* 6*d.*

33 ,, **MAJOR**, 15*s.*

34 **LONGIFLORUM**, 9*d.*

35 ,, **FOLIIS ALBO-MARGINATIS**, 7*s.* 6*d.* and 10*s.* 6*d.*

LILIUM HUMBOLDTII, for description and price, *vide* page 17.

36 **LONGIFLORUM TAKESIMÆ**, 3*s.* 6*d.*
37 **MARTAGON**, *(Turk's Cap Lily)*, purple, 9*d.*
38 ,, **ALBUM**, white, 2*s.* 6*d.*
39 ,, **AURANTIACUM**, yellow, 9*d.*
40 ,, **COCCINEUM**, scarlet, 9*d.*
41 **MONADELPHUM (COLCHICUM)**, 3*s.* 6*d.* and 5*s.*
42 **MONADELPHUM SZOVITZIANUM**, flowers of a rich citron colour, spotted with black; one of the finest known species. 3*s.* 6*d.* and 5*s.*
43 **PARDALINUM**, 5*s.*, 7*s.* 6*d.* and 10*s.* 6*d.*

LILIUM TIGRINUM FLORE-PLENO.

82 This attractive variety produces beautiful double flowers of a bright orange scarlet colour; the segments are thickly studded with dark brown spots except at the tips, which are recurved. It has been introduced from Japan, and is a novel and extremely handsome variety. It can be strongly recommended as one of the very best Lilies in cultivation. For illustration, *vide* page 20. 7*s.* 6*d.* and 10*s.* 6*d.*

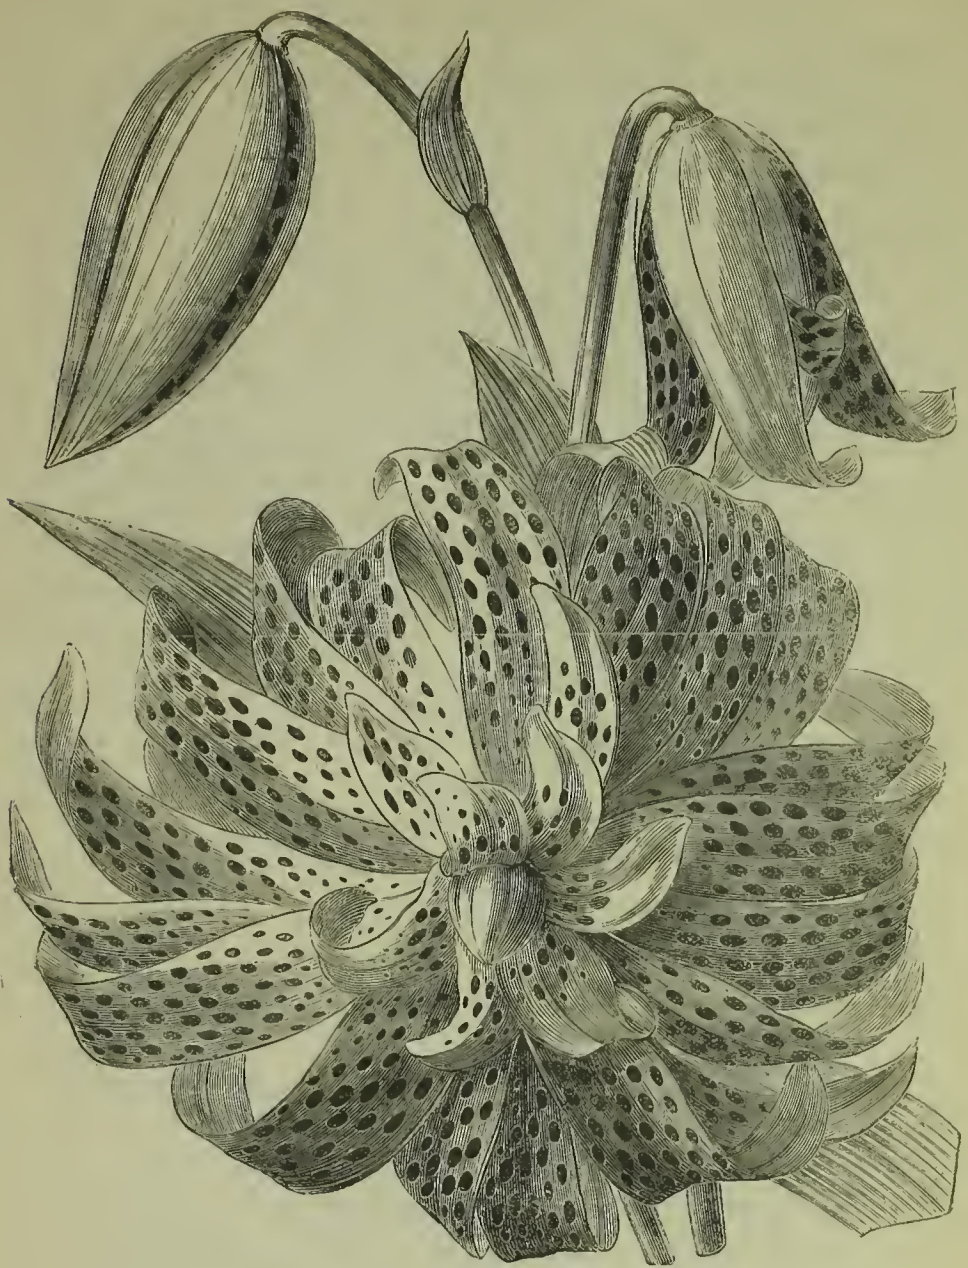
87 ,, WALLICHIANUM, 1 and 1½ guinea.



LILIUM TIGRINUM FLORE-PLENO, for description and price, *vide* page 19.

LILIUM WASHINGTONIANUM.

A superbly beautiful species from Nevada, California, growing about 5 feet high, and producing, according to the strength of the bulbs, a long panicle of 6, 12, to 18 flowers, which have long tubes and widely expanded mouths, white, more or less tinged with purple and lilac, and are deliciously fragrant. For illustration, *vide* page 21. 3*s.* 6*d.*, 5*s.*, and 7*s.* 6*d.*

LILIUM WASHINGTONIANUM, for description and price, *vide* page 20.

LILIUM WASHINGTONIANUM PURPUREUM.

This beautiful new Lily has been discovered and sent from Humboldt County, California. The collector writes that it is the finest of all the Californian Lilies, and describes it as producing very fragrant flowers, about twelve on a stem; the petals on opening are of a beautiful purplish satin colour, changing to a delicate purple lilac. 5*s.*, 7*s.* 6*d.*, and 10*s.* 6*d.*

Selections of Lilies made at 12s., 18s., 30s., 42s., and 60s. per dozen.

Where the selection is left to Mr. W. B., the Catalogue prices are not strictly adhered to, the purchaser being given a considerable advantage.

Large importations of choice Lilies are expected, and when they arrive the prices of the newer sorts will be reduced.

DOUBLE TUBEROSES.

(POLYANTHES TUBEROSA.)

The bulbs of this beautiful and fragrant flower will not be sent out before the middle of December.

Selected strong bulbs, 4s. and 6s. per dozen.

HANDSOME-FLOWERED BEGONIAS, for price, *see* next page.

BEGONIAS.

TUBEROUS-ROOTED SECTION.

The following novel and beautiful varieties will be found admirably adapted for the summer and autumn decoration of the Greenhouse and Conservatory; for they produce in the utmost profusion magnificent flowers of very large size, and great variety in colour. They do not require stove cultivation, but will succeed well in a Greenhouse. The tubers rest during the winter months, similar to Gloxinias, and can be easily re-started into growth in the spring. Their profuse flowering quality, and the charming variety of colour of their blossoms, render them extremely showy and effective. 3*s.* 6*d.*, 5*s.*, 7*s.* 6*d.*, and 10*s.* 6*d.* each. Choice Selections made by Mr. W. B. at 30*s.*, 42*s.*, and 60*s.* per dozen.

These could be sent in tin boxes, by post.

ANACREON, bright deep crimson, a beautiful flower, with very long petals; exceedingly attractive.

AURELIA, a very large fine flower, of a cinnamon-rose colour; very distinct.

AURORA, a splendid variety freely producing fine large flowers of an extremely attractive shade of orange-scarlet colour; very showy and effective.

BOLIVIENSIS, foliage light green, flowers bright glossy red, very freely produced, generally in pairs, but sometimes in whorls of three. The male blossoms are as large again as the females, and of a compressed bell-shaped form.

BRILLIANT, very rich bright orange, a dazzling colour, flowers large and fine, very showy and attractive.

CARDINAL, a magnificent variety, producing fine large flowers of a rich deep magenta-rose colour.

CARMINATA, the leaves are stained with a coppery brown tint between the veins, while the flowers are large, of a pretty delicate salmony hue tinged with rose.

CARNEA ELEGANS, a charming variety, with vivid brown stems, and oblong acuminate doubly-serrated glossy leaves. The flowers are a rich rosy salmon colour, suspended on long gracefully drooping pedicels or flower stems.

CAROLINE, deep rosy pink, a very fine showy flower, with broad petals.

CLIMAX, deep rich rosy carmine, the two outer petals extremely broad; a beautiful variety.

CORSAIR, rosy salmon; a most profuse blooming variety.

DAZZLE, bright reddish crimson; a fine flower, with short broad petals.

DRAGON, a beautiful flower, with very fine large long petals, colour rich bright rose; very effective.

DR. MASTERS, a beautiful and effective variety, with very rich carmine-crimson drooping flowers, suspended on salmon-tinted pedicels or flower stalks.

ECLIPSE, a magnificent variety, producing fine large flowers of a very bright and rich carmine-scarlet colour; extremely showy.

EMBLEM, a very attractive variety, giving fine large showy flowers with extremely broad petals, of a deep rose colour shaded with magenta.

ENSIGN, bright pink, a beautiful shade of colour, flowers large and fine; a very elegant variety.

GEM, light cream colour, the reverse of the petals light pink; extremely distinct and attractive.

GLITTER, vivid orange-scarlet, an extremely bright and showy colour; fine large flower.

HERMINE, light orange cinnamon, a very distinct and attractive shade of colour; a pretty flower, large and well formed.

INTERMEDIA, a remarkably fine hybrid, of free-branching strong upright growth. The flowers are of the size and form of *B. Veitchii*, which they also resemble in colour, but are of rather a darker shade.

LOTHAIR, a splendid variety, producing fine large showy flowers with short broad petals, of a deep rose colour; very fine.

LUCINDA, an extremely attractive variety, producing very large and fine flowers with remarkably long petals, of a deep rose colour.

MAGNET, beautiful light pink, the reverse of the petals deep pink; a very beautiful variety, producing fine large flowers with good petals.

MAZEPPA, very light cream colour, the reverse of the petals tinted with orange pink; extremely distinct and pretty.

METEOR, intense scarlet vermilion, very bright and showy; a magnificent variety.

MINIATA, a fine showy variety, producing flowers of a bright rosy carmine colour; very elegant and distinct.

MRS. MASTERS, a very effective and ornamental variety, producing bright rose carmine blooms in great profusion upon salmon-tinted drooping pedicels or flower stalks.

BEGONIAS—Continued.

OCTOPETALA, this magnificent new species has been introduced from the Andes of Peru. Its rich dark green leaves are very large, of orbicular form and deeply lobed. It produces splendid flowers of enormous size, which are composed of eight petals; these attractive blossoms are white, with the reverse of the petals of a bright rosy carmine colour. It is an extremely showy and effective novelty.

PEARCEI, flowers large, bright yellow, and borne on slender stems well above the foliage.

PEARCEI GRANDIFLORA, a remarkably fine and attractive variety, with rich dark olive green leaves, which contrast admirably with the very large and fine flowers, which are of a bright golden yellow colour.

PHYLLIS, a most beautiful variety, with flowers of a delicate sulphur colour, tinted with pink; an extremely distinct and charming flower.

PROFESSOR THISELTON DYER, a highly ornamental variety, giving a profusion of brilliant scarlet flowers, with lance-shaped petals, borne in elegant drooping clusters.

ROSEA ALBA, a very elegant variety, with glossy rich green-veined leaves, and numerous terminal projecting racemes of white blossoms, suffused with rich rose.

RUBESCENS, a fine hybrid variety, of neat, robust, branching, dwarf habit, giving a profusion of elegant half-drooping racemes of large rich salmon-tinted red blossoms.

RUBRA SUPERBA, a very beautiful and effective plant, of a free branching habit and graceful open outline; flowers large, of a brilliant carmine red, melting into a rich lake.

SEDENII, a fine variety, of free growth, with large leaves, the veins of which are slightly tinted with rose colour; the flowers are of the richest magenta, and of large size.

SERAPH, a dwarf-growing variety, of neat and compact habit, freely producing fine flowers of a soft pink colour, the exterior part of the two outer petals suffused with rose.

STARLIGHT, a beautiful variety, of dwarf compact habit, and a profuse bloomer; the flowers are large and effective, of a pretty shade of blush pink.

SUNRISE, a magnificent variety, quite intermediate between *B. boliviensis* and *B. Sedenii;* it is a very free bloomer, producing fine large flowers, of a bright rosy scarlet colour; extremely showy and attractive.

SURPRISE, a beautiful and effective variety, producing extremely pretty bright pink flowers in great profusion.

TROJAN, an extremely distinct and effective variety, freely producing fine flowers of a lovely light rosy pink colour.

VEITCHII. This remarkable and beautiful plant, which was discovered near Cuzco in Peru, introduces quite a new feature into the now well-known family of Begonias. It differs in all respects from any other Begonia yet known, in having immense blooms of a vivid vermilion or cinnabar red, and in being comparatively hardy.

VIVICANS, a very graceful plant, approaching in habit *B. insignis* or *B. Sedenii*, with semi-transparent stems, its leaves slightly villose or hairy, and numerous drooping brilliant orange scarlet bell-shaped flowers, with acuminate petals, on carmine tinted flower stalks. The free open-branched habit of this variety is very elegant and effective.

BEGONIAS.

VARIEGATED-FOLIAGED SECTION.

These are remarkable for their variegated and beautifully coloured ornamental foliage.

ROSANOWIA (BIGLANDULARIA).

This is a new genus of Gesneraceæ, with the habit of Scheeria and Locheria, nevertheless not belonging to the Achimenes tribe, but to the Ligeriæ. It is closely allied to Sinningia (*Nees*) and Ligeria (*Decne*), having a tuberose rhizome, and a similarly-shaped corolla, but both these genera have five perigynous glands, whilst Biglandularia has only two, in which respect it differs also from every other known genus of the order. 2*s.* 6*d.* and 3*s.* 6*d.* each, according to sorts.

Citrino-amarantina
Conspicua
Roseo-luteo
Straminea striatella.

For descriptions, *vide* Mr. W. B.'s Plant Catalogue.

EUCODONIAS.

These exceedingly pretty hybrid Gesneraceous plants have nicely tinted ornamental foliage, and extremely beautiful flowers, which are freely produced on small plants. The flowers are nearly the size and form of a drooping Gloxinia, but have the soft colouring and elegant markings of some of the attractive Tydæas. 1*s.* 6*d.* and 2*s.* 6*d.* each, according to sorts.

For descriptions, *vide* Mr. W. B.'s Plant Catalogue.

GESNERAS (NÆGELIAS).

The value of Gesneras, as decorative plants, can scarcely be over-estimated. Most of them have rich velvet-like foliage, which, in the respective kinds, varies from green to crimson. If only grown for the foliage, they are very attractive, but during the winter they produce splendid pyramidal spikes of blossom, which are extremely handsome. Until recently, however, the principal colour was orange scarlet; now, resultant from fertilisation, there are various colours and shades; added to which, the spotting on the flowers of some of the varieties is extremely pretty. 18*s.*, 24*s.*, and 30*s.* per dozen, according to sorts.

SHRUBBY GLOXINIA "INSIGNIS."

This distinct variety produces its flowers during the autumn and winter; colour bluish lilac, marked with a large crimson blotch at the base of the tube. 2*s.* 6*d.*

GLOXINIA MACULATA ROSEA CHIRITIFORMIS.

This novel hybrid will prove quite an acquisition, for it blooms during the whole of the winter. Its foliage is very beautiful, of a bronzy amaranth, and its flowers, which are produced abundantly, are of a beautiful bright rose, with a bluish tint. 2*s.* 6*d.*

GLOXINIA MACULATA SCEPTRUM.

A magnificent hybrid, with extra large erect foliage. It produces a rigid terminal inflorescence, exceeding 20 inches in height, which bears majestically its large clear lilac well-formed blooms. The leaves are cordate and pinked. 3*s.* 6*d.*

CALADIUMS.

,, ,, **FOLIIS VARIEGATIS**	2*s.* 6*d.* &	3 6
,, ,, **PALLIDUS**	2	6

Well-known plants, whose attractive foliage and large heads of blossom adapt them for all kinds of ornamental gardening. Protect in pits during winter.

ALLIUMS, of sorts	3*d.* to	0 6

Hardy summer-flowering bulbs, which succeed and bloom well in any soil.

ALOCASIA GIGANTEA	5*s.* &	7 6

ALOCASIA HYBRIDA.

A fine hybrid, raised in Mr. W. Bull's establishment, between *A. Lowii* and *A. metallica*. The leaves are of a deep olive-tinted green on the upper surface, having stout well-defined ribs and the margin of an ivory white; they are of a dull purple at the back, elliptic in outline, with a short acuminate point, and very slightly parted at the base, in which respect the new variety differs most conspicuously from *A. Lowii*, which has the leaves deeply parted. The young leaves are of a bronzy tint while unfolding. 15*s.* and 1 guinea.

ALOCASIA ILLUSTRIS.

A free-growing bold-habited stove perennial, intermediate in its general aspect between *Alocasia* and *Caladium*. The leaf-stalks are erect, and have a brownish purple tint, while the leaf-blades are deflexed, 1½ foot long, peltately attached, ovately sagittate, with bluntish basil lobes, rounded in front, with a small apiculate point, the colour a rich green, marked between the principal veins by broad patches of blackish olive, extending almost from the midrib to the margin, and forming a striking contrast with the brighter green portions of the leaf surface. It is somewhat in the way of *A. Jenningsii*, but is of much larger and more vigorous growth, and of a brighter, less glaucous green. It was obtained from the East Indies For illustration, *vide* page 32. 7*s.* 6*d.* and 10*s.* 6*d.*

ALOCASIA INTERMEDIA	7*s.* 6*d.* &	10 6
,, **JENNINGSII**	2*s.* 6*d.* &	3 6
,, **LOWII**	5*s.* 0*d.* &	7 6

ALOCASIA MARSHALLII.

A remarkably fine new Aroid, related to, and much in the way of, *A. Jenningsii*, but differing in having a broad grey band down the centre of the leaf. The leaves are ovate-peltate, attached to erect green stalks, the blades standing almost vertical, while the colour is a bright green, marked between the principal veins with broad wedge-shaped blotches of blackish purple; the addition of the silvery band adds very greatly to their beauty. It was imported from India. 7*s.* 6*d.* and 10*s.* 6*d.*

ALOCASIA METALLICA	3*s.* 6*d.* &	5 0
,, **ZEBRINA**	7*s.* 6*d.* &	10 6
ALSTRŒMERIA AUREA, orange, spotted with carmine		0 6
,, **BRASILIENSIS**, amaranth red, striped mahogany, and spotted with black		0 6
,, **CHILIENSIS**, choice mixed		0 6
,, **ERREMBAULTI**		0 6
,, **HÆMANTHA**, orange		1 6
,, **PELEGRINA**, white, shaded with lilac, half hardy		2 6
,, ,, **ALBA**, half hardy		2 6
,, **PERUVIANA** (*versicolor*), choice mixed		0 9

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

	Each—*s.*	*d.*
ALSTRŒMERIA PSITTACINA, crimson and green	1	0
,, **TRICOLOR**, black, white, and yellow, half hardy	1	6

Very beautiful and free-flowering hardy and half hardy plants, with elegant trusses of Gladiolus-like flowers, for cultivation in dry borders and conservatories.

AMARYLLIS, *vide* pages 11 and 12.

AMORPHOPHALLUS KONJAK	10	6
,, **RIVIERI**	3*s.* 6*d.* &	5 0

BELLADONNA LILY, *vide* page 12.		
BIGLANDULARIA, *vide* Rosanowia.		

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

BIGNONIA ROEZLIANA.

A handsome climber, remarkable for the rich tints displayed upon the younger leaves. It forms a swollen woody stem or root-stock, from which issue the slender climbing growths, furnished with opposite petiolate leaves, which in the lower parts of the plant are entire, but on the upper parts become bijugate, with a trifid tendril. The leaves are regularly reticulated, the costa and primary veins more strongly, with silvery grey, the ground colour in the mature leaves being green, but in the younger stages suffused with a rich lustrous violaceous tint, which renders them exceedingly beautiful. The under surface is of a rich purple. It has been sent to this country from New Grenada. 10*s.* 6*d.*, 15*s.*, and 1 guinea.

	Each—*s.*	*d.*
BLETIA FLORIDA	15	0
,, **SHEPHERDII**	21	0
BLOOMERIA AUREA, a remarkable acquisition; flower stem 12 to 18 inches high, producing an umbel of numerous yellow flowers, streaked with dark brown . . 3*s.* 6*d.* &	5	0
BOBARTIA AURANTIACA, very pretty rich orange flowers	0	3
BOMAREA BREDAMEYERAMA, orange	2	6
,, **HIRTELLA**	2	6
,, **JACQUESIANA**, salmon coloured rose	3	6
,, **MULTIFLORA**, orange red flowers, dotted with crimson	3	6
,, **OCULATA**, red and green	1	6
Bomareas differ from Alstrœmerias more particularly in their twining stems, and produce neat foliage and elegant drooping flowers.		
BOUSSINGAULTIA BASSELOIDES, a pretty, climbing, bulbous-rooted plant, bearing small white flowers from September to October	1	6
BRAVOA GEMINIFLORA, a pretty greenhouse bulb, with rich crimson tube-like flowers	0	6
BRODIÆA COCCINEA (" *Vegetable Fire Cracker*" of California), umbels of deep magenta crimson, drooping flowers; very showy . . 1*s.* 6*d.* &	2	6
,, **CONGESTA**, bright blue, hardy	0	3
,, **GRANDIFLORA**, dark blue, dwarf and hardy	0	6
,, **VOLUBILIS**, light rosy purple	3	6
BULBOCODIUM VERNUM (*Spring Colchicum*), rosy lilac Crocus-like flowers; a very pretty early-flowering bulb, well adapted for pot culture, or for open borders . per doz., 1*s.* 6*d.*	0	2

,, **HYBRIDUM** 15 0

,, **McKENII** 15 0

,, **PRATENSE**, an exceedingly handsome species 15 0

CRINUM PRATENSE CANALICULATUM.

An interesting hothouse bulb, with slighly fragrant flowers, belonging to a family which is not now sufficiently appreciated by cultivators. It has large ovate bulbs, more than 3 inches in diameter, having a thickish cylindrical neck 3 to 4 inches long, both bulb and neck covered with a dark brown skin ; the leaves are channelled, 1¼ feet long, about an inch wide at the base, gradually narrowing upwards, scabrous at the edge ; the scapes, ten of which are borne on a bulb of this size, are 15 inches high, terminating in an umbel of about a dozen flowers, which issue from between a pair of ovate bracts, and are erect while in bud. The perianth has a slender tube, 4 inches long, pale green, and a limb of six linear-lanceolate spreading segments, 2½ inches long, and of a blush white colour, so that the flowers are nearly 6 inches across. Opposite to each segment, and about one-third of its length, also spreading in the same direction, is a stamen, the filament of which is white at the base, rosy purple upwards, bearing a versatile anther half an inch long, with golden brown pollen. The style is of the same length and colour as the filaments ; the flowers are extremely elegant, and useful for cutting. It has been introduced from India. For illustration, *vide* page 2. 5*s*. each ; 50*s*. per doz.

CRINUM RIPARIUM, pink, half hardy 7 6

Very ornamental stove and greenhouse bulbs, producing large handsome Lily-like flowers.

CROCOSMA, *vide* **Tritonia**, page 23.

CROWN IMPERIAL, *vide* page 13.

CUMMINGIA TRIMACULATA, half-hardy bulb, having numerous pretty bell-shaped blue flowers, with black and white spots 1 6

CYCLAMEN, *vide* page 13.

CYCLOBOTHRA ALBA (The *Alabaster Star Tulip* of California), white, bell-shaped flowers. 2 6

,, **CÆRULEA**, blue, very showy and handsome 3 6

,, **LUTEA**, fine yellow bell-shaped flowers . . . . . 1*s*. 6*d*. & 2 6

,, **PULCHELLA** (The *Golden Star Tulip* of California), beautiful globular fringed flowers, of a deep rich yellow colour 2 6

Handsome flowering half-hardy bulbs, of Fritillaria-like growth.

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

Each—*s.* *d.*

CYPELLA HERBERTI, half-hardy free-flowering bulb, bearing orange coloured Tigridia-like flowers 0 3

CYPRIPEDIUM ACAULE (*Lady's Slipper*), purple 2 6

,, **CALCEOLUS**, yellow 1 6

,, **CANDIDUM** (*Mocassin Flower*), white, with purple spots around the mouth 7 6

DIOSCOREA ANÆCTOCHILUS . . . . . 5*s.* & 7 6

DIOSCOREA ARGYRÆA.

This pretty slender stove climber has been introduced from New Grenada. It has wiry stems, and cordate seven-nerved green leaves, the nerves of which are bordered with distinct irregular angular patches of silvery gray, which, being thus disposed, appear to form a series of broken variegated silvery bands, extending from the base to the apex. The blade of the leaf is about 5 inches across, and slightly more in length, and the petioles are thickened both at the base and apex. 1 guinea.

DIOSCOREA DISCOLOR VARIEGATA . . . . . 3*s.* 6*d.* & 5 0

DIOSCOREA ILLUSTRATA.

A handsome foliaged tuberous-rooted stove climber, imported from Rio Grande do Sul. The stems are wiry ; the leaf-stalks angular. The leaves are cordato-sagittate, about 6 inches across, abruptly apiculate, and produced at the base into two bluntish lobes, which are 3 inches long, the blade from the petiole to the tip measuring about 5 inches. The size and marking of the leaf are the peculiar features of the plant. There is an irregular central band of silvery gray, and a few angular patches of the same colour generally placed in juxtaposition with the ribs, of which there are four on each side the costa. The surface is a satiny green, shaded with olive green, and marked by fine transverse whitish parallel lines between the nerves, a third series of irregular veinlets crossing between the latter. The under surface is purple. For illustration, *vide* page 37. 10*s.* 6*d.*

DISCOREA METALLICA . . . . . 15*s.* & 21 0

DODECATHEON INTEGRIFOLIA, lilac and pink 2 6

,, **JEFFREYANA**, lilac and pink 3 6

,, **MEADIA** 0 9

,, ,, **ALBA**, white 1 0

,, ,, **ELEGANS**, rosy lilac 1 6

,, ,, **PURPUREA LONGIFLORA**, dark purple . . . 3 6

Pretty hardy border plant, popularly known as the American Cowslip.

DRACONTIUM ASPERUM. This Aroid will not vie in size with *Godwinia gigas*, but is very much like it in aspect. The leaf stalks are from 5 to 6 feet in length, covered by an epidermis which is smooth and pinkish above, but from the middle downwards is marked by small, scattered, conical asperities, and wavy bands or blotches of a purplish colour, mottled with white. The leaf blades spread horizontally, extending from 3 to 4 feet across, dark

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

Each—*s.* *d.*

green above, paler beneath, and perfectly smooth. The flower spathe is erect, boat-shaped, of a purplish brown colour on the exterior, and rich purple in the interior. The spadix is erect, about 2 inches long, and densely covered with hermaphrodite flowers 10 6

DIOSCOREA ILLUSTRATA, for description and price of tubers, *vide* page 36.

ERANTHIS HYEMALIS (*Winter Aconite*), a beautiful hardy spring-flowering plant, producing its bright yellow flowers about the same time as the Snowdrop, per 100, 3*s.* 6*d.*; per doz., 6*d.*

,, **CUNNINGHAMI** (*The Brisbane Lily*) 3 6

FERRARIA UNDULATA (*Tigridia*), greenish brown flowers 1 0

FOURCROYA (AGAVE) BULBOSA. This remarkable plant, sent from New Grenada by M. Roezl, is a bulbous Agave. In the young state the plants form a thickened base from the persistence of the broad overlapping lower part of the leaves, these being linear-lanceolate, slightly undulated, thinnish and at first rather fleshy in texture, but soon becoming firmer. When in flower it is an extremely striking object; it produces an immense branched spike of flowers, which in its native country attains a height of from 20 to 30 feet. This spike bears hundreds of beautiful pure white flowers, with the margin of the petals green on one side. These flowers have the additional recommendation of being deliciously fragrant. It is one of the most attractive and handsome plants ever introduced, and being of a robust and comparatively hardy constitution will succeed out of doors in sheltered localities . 7*s.* 6*d.* & 10 6

FRITILLARIA, *vide* page 13.

FUNKIA LILIIFLORA, a splendid variety; flowers of great dimensions (4 inches across), snowy white, and highly odoriferous 5 0

GALANTHUS NIVALIS (*Snowdrop*), *vide* page 10.

GASTRONEMA SANGUINEUM, half-hardy plant, with brilliant scarlet flowers . . 5 0

GASTRONEMA SANGUINEUM FLAMMEUM.

This beautiful dwarf-growing Amaryllidaceous plant, imported from South Africa under the name of *Vallota flammea*, is evidently a near ally of *Gastronema sanguineum* from the same country. It is, however, a well-marked variety, generally producing two-flowered instead of single-flowered scapes, and having a more roseate less sanguineous hue in the flowers, which are of a lovely rosy carmine colour, the striped interior of the tube being lit up by the bright yellow of the anthers. It is a most charming little greenhouse bulb, flowering in the spring months simultaneously with the leaves. 7*s.* 6*d.* and 10*s.* 6*d.*

Very beautiful tuberous-rooted plants, of climbing habit, with elegant orange tinted flowers.

GLOXINIA, *vide* pages 29 and 30.

GODWINIA GIGAS.

This is the largest Aroid, both in leaf and flower, of which we have as yet any precise knowledge. It was discovered by Dr. B. Seemann, near to Javali mine, in the Chontàles Mountains of Nicaragua. It produces only a solitary leaf, and after that has died off, the flower spathe makes its appearance, both leaf and spathe being of gigantic dimensions. The petiole is covered with minute spiny projections, and has a beautifully mottled metallic surface, brimstone yellow, barred and striped with purple, giving it the appearance of a snake standing erect. The blade of the leaf is green

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

on both sides, and divided into three primary sections, which are again repeatedly subdivided, the extreme divisions being ovate-acuminate. The peduncle is mottled, rough, with minute spiny projections like the petiole, and furnished towards the base with several large bracts. The flower spathe is of a thick leathery texture, outside of a dark bluish brown, and inside of a dark brownish red, with the exception of the base and those parts surrounding the spadix, which are whitish yellow. 21*s.*

MISCELLANEOUS BULBOUS AND TUBEROUS-ROOTED PLANTS—Continued.

PANCRATIUM NOTATUM.

In consequence of a large importation of this useful free-flowering plant, Mr. William Bull can offer fine strong-blooming Amaryllis-like bulbs. Its showy white flowers are produced in clusters of 9 to 12 on stiff erect scapes, the outer segments 3 to 4 inches long, with funnel-shaped centre crown upwards of an inch in diameter. The blossoms are deliciously fragrant and extremely elegant, and useful for cutting for bouquets, &c. For illustration, *vide* page 1. Per doz., 30*s.*; each, 3*s.* 6*d.*

WILLIAM BULL, F.L.S.,

RESPECTFULLY INVITES THE NOBILITY AND GENTRY ABOUT TO FURNISH CONSERVATORIES TO AN INSPECTION OF THE

MAGNIFICENT SPECIMEN ORNAMENTAL PLANTS

IN HIS

WINTER GARDEN,

SOME OF WHICH ARE THE HANDSOMEST IN EUROPE;

THEY COMPRISE

MAJESTIC TREE FERNS
VARIEGATED ALOES AND YUCCAS
UNIQUE MACROZAMIAS AND ENCEPHALARTOS
NOBLE PALMS, MUSAS, AND DRACÆNAS
BEAUTIFUL CAMELLIAS AND LAPAGERIAS
GORGEOUS INDIAN RHODODENDRONS
CURIOUS CYCAS AND AGAVES
PICTURESQUE PHORMIUMS AND ARAUCARIAS,

AND

HANDSOME STANDARD BAYS,

WITH SYMMETRICAL HEADS,

For Terrace Gardens or Conservatories.

Amateurs having plants that have grown too large for their Greenhouses or Conservatories, can have them exchanged for New and Rare Plants, on application to Mr. WILLIAM BULL, who will also be happy to take any duplicates or large plants of the older sorts of Orchids in exchange for small plants of the newer kinds, or other New Plants

ESTABLISHMENT FOR NEW AND RARE PLANTS,
